

Project Goals & Description

- NCC selected Ameresco through a competitive bid process to provide energy services
- NCC's goals: create a carbon neutral community, spark economic development, create green jobs that provide opportunities for all citizens, protect the environment

Project Scope

- Work with Ameresco to reduce energy demand and costs in 20 County facilities
- Identified 158 energy, water, and cost saving measures and two solar installations

Proposal Highlights

- Highlights of the proposal includes:
 - lighting retrofits and controls
 - energy management systems
 - premium efficiency motors
 - heat pumps, boilers, and cooling towers
 - ventilation and HVAC improvements
 - two solar installations totaling over 120kw
 - Other innovative ECMs including green roofs.
- In total, reduce emissions by 11,823,706 pounds of CO2 per year.
- Reduced emissions equivalent to about 1,100 polluting cars and power for almost 250 homes
- County wide savings over 20 years are guaranteed to be over \$450,000 annually
